

FixOps — Payroll User Guide

Step-by-step guide to processing monthly salary. For HR and Admin.

1. Overview

Payroll runs **one salary run per month**. The run pulls attendance for that month, calculates overtime and absence deductions automatically, and creates one payslip per active employee. You then mark the run as paid, which records the payment date and mode on every payslip.

Only staff with **Employment Status = Active** are included in a payroll run. Anyone left inactive is silently skipped — this is the most common reason someone goes missing from a run.

2. Before You Start

Everything below feeds the calculation. Fix it **before** processing — a payslip is a snapshot and does not update itself afterwards.

Attendance complete	Every working day marked for every employee. Missing days are simply not counted.
Absences marked	Status Absent counts as 1 day, Half Day as 0.5 day.
Public holidays flagged	Tick Public Holiday on those attendance records. Fridays are detected automatically; other holidays are not.
Missing clock-outs fixed	A record with no clock-out contributes no overtime hours.
Advances recorded	Add any advance or loan on the staff profile so its balance is available to recover.
Salary components correct	Basic, allowances, food, fixed OT and the Friday OT rate on each staff profile.
Employment status	Confirm active staff are Active and leavers are not.

3. Processing Salary — Step by Step

Go to **Payroll > Process Payroll** (the page is titled *Payslips*).

1 Select the month and year

Pick the month and year at the top of the page, then click **Load**.

If a run already exists for that period, a status pill appears on the right — *draft*, *approved* or *paid* — and the entry form is replaced by the processed figures.

2 Review the auto-calculated table

Every active employee is listed with Basic, Allowance, Food, Fixed OT, Normal OT, Fri/Hol OT, Absent days and Absent Deduction.

All of these are pulled from the staff profile and that month's attendance — they are read-only here.

Coloured banners at the top tell you what was detected: absent days, normal OT, Friday/holiday OT, or that no attendance exists at all.

If you see "No attendance records found for this month", the full salary will be paid with no OT and no deductions. Go back and mark attendance first.

3 Enter the two manual figures

Only two columns accept input — both marked with a pencil icon:

- **Food Deduct** — any food cost being recovered this month.
- **Adv. Deduct** — how much of the outstanding advance to recover. This column only appears when at least one employee has an advance balance.

Leave a field blank or 0 to recover nothing; the balance carries forward.

The advance recovery is capped at the employee's outstanding balance, so you cannot over-recover even if you type a larger number.

4 Check the Net column

Net updates live as you type, and the total deducted is shown underneath each Net.

A negative net displays as 0.000 in the preview. If that happens your deductions exceed the salary, so reduce them before processing.

5 Process the payslips

Click **Process N Payslips**.

This creates the salary run and one payslip per employee in a single action, and immediately reduces each employee's advance balance by the amount you recovered.

The entry form is replaced by four summary cards — Basic Salary, Allowances, Overtime, Net Payable — and a **Print** link appears on every row.

Only one run is allowed per month. Processing again for the same month is rejected with "Payroll already processed for this month".

6 Verify, then pay

Open a few payslips and check them. When satisfied, click **Pay N Salaries**.

Choose the **Payment Mode** (Bank Transfer, Cheque or Cash) and the **Payment Date**, then confirm. Every pending payslip is marked paid with that date and mode, and the run status becomes *paid*.

The payment mode matters for your books: salaries paid in **Cash** appear in the Cash Book, and bank/cheque payments appear in the Bank Book, both dated by the payment date you choose here.

7 Distribute the payslips

Print individually from the **Print** link on each row, or use **Print Summary** for the whole run.

Staff can see their own payslips under **My Payslips** — they cannot see anyone else's.

Who can do what

Process payroll	Owner, Admin, Manager
Pay salaries	Owner, Admin, Manager, Accounts
Reset & re-process	Owner, Admin only

4. How Each Figure Is Calculated

Normal (daily) overtime

$\text{Basic} \div 30 \div 8 \times \text{OT paid hours}$

The hourly rate is derived from Basic — there is no separate OT rate field. The 1.25x premium is already applied when attendance is saved, so OT paid hours are post-premium hours.

Friday / public holiday overtime

Sum of the Friday OT amount on each Friday or holiday worked

Taken from the attendance record; if that is 0 it falls back to the rate on the staff profile.

Fixed monthly overtime

Paid only if OT-eligible AND worked a Friday or public holiday that month

It is not an unconditional monthly amount — a month with no Friday/holiday work pays no fixed OT.

Absence deduction

$(\text{Basic} + \text{Allowance} + \text{Fixed OT}) \div 30 \times \text{absent days}$

Allowance here means housing + transport + other. The food allowance is not part of this deduction.

Gross

$\text{Basic} + \text{Allowance} + \text{Food} + \text{Fixed OT} + \text{Normal OT} + \text{Friday/Holiday OT}$

Net

$\text{Gross} - \text{Absence deduction} - \text{Food deduction} - \text{Advance recovery}$

Overtime eligibility — what it does and does not gate

- Staff who are **not** OT-eligible get **no daily overtime** and **no fixed OT**.
- Friday and public-holiday OT is paid to **every** employee, eligible or not.
- For non-eligible staff, daily overtime hours are forced to zero when attendance is saved, so nothing leaks into payroll.

5. Staff Salary Setup

Configured per employee under **HR > Staff**.

Basic Salary	Core monthly salary. Also the basis for the overtime hourly rate and the absence deduction.
Food Allowance	Paid as its own line on the payslip. Excluded from the absence deduction.
Other Allowance	Any additional allowance. Label it using the Allowance Name field.
Allowance Name	Custom label — e.g. Housing Allowance, Transport Allowance.
Fixed Overtime Monthly	Paid only in months where the employee is OT-eligible and worked a Friday or public holiday.
Overtime Eligible	Gates daily overtime and fixed OT only. Friday/holiday OT is unaffected.

Friday OT Amount

Flat KWD amount per Friday or public holiday worked.

The **Total Monthly Bill** on the Payroll overview is Basic + Allowances + Food + Fixed OT for all active staff. It excludes variable overtime, which is only known once a run is processed.

6. Attendance & Overtime Rules

Regular weekday (Sat — Thu)

- Standard shift 8:30 AM — 5:30 PM (8 hours)
- 1-hour lunch deducted if the shift spans 1:00 — 2:00 PM
- **Fixed OT band:** 5:30 PM — 8:00 PM
- **Normal OT:** after 8:00 PM, at 1.25x (1 hour worked = 1.25 paid hours)

Friday / public holiday

- The flat Friday OT amount applies for the day worked
- Paid to all staff, including those not marked OT-eligible
- Fridays are detected automatically; other public holidays must be ticked manually

Self-clocking: staff clock in and out via *My Attendance*. HR and Admin can add or correct any record from *HR > Attendance*.

There is no public-holiday calendar. Any non-Friday holiday must be ticked as **Public Holiday** on each affected attendance record, or it will be treated as a normal day.

7. Advances & Loans

Recording an advance

- 1 Go to **HR > Staff** and open the employee
- 2 Add the advance or loan with amount, date and reason
- 3 The outstanding balance updates immediately

Recovering it from salary

- 1 The outstanding balance shows in the **Adv. Bal.** column during processing
- 2 Type the amount to recover in **Adv. Deduct** (partial or full)
- 3 Processing reduces the balance; the remainder carries forward

Record advances *before* processing. An advance added afterwards will not appear on that month's payslip unless you reset and re-process the run.

8. Fixing Mistakes

A payslip is a snapshot taken at the moment you processed. Editing attendance, salary components or advances afterwards does **not** change an existing payslip.

To correct a processed run

- 1 Fix the underlying data first — attendance, salary components or advances
- 2 Open the run's month on the Payslips page
- 3 Click **Reset & Re-process** and confirm
- 4 All payslips for the run are deleted and any advance recovery is added back to each balance
- 5 Process the month again with the corrected figures

A run that has been paid cannot be reset. The button disappears once the run is marked paid, and the request is rejected by the server. Check the figures carefully before paying.

9. FAQ

An employee forgot to clock out. What do I do?

Go to HR > Attendance, open that date's record and enter the check-out time. Overtime is recalculated when the record is saved. Do this before processing payroll.

Can I edit a payslip after it has been generated?

No. Fix the source data, then use Reset & Re-process on that month and process it again. This is not possible once the run has been paid.

Why is Fixed OT showing as zero for someone?

Fixed monthly OT is paid only when the employee is overtime-eligible and worked at least one Friday or public holiday in that month. With no Friday or holiday worked, it is zero.

Why is there no Friday OT on a Friday record?

Check the Friday OT Amount on the staff profile. If it is 0 and the attendance record has no amount stored, nothing is paid. Also confirm the day is marked Present or Half Day.

A staff member is not eligible for overtime but worked a public holiday. Do they get paid?

Yes. Friday and public-holiday OT is paid to every employee. Only daily overtime and fixed OT depend on the overtime-eligible flag.

Someone is missing from the payroll run entirely.

Their Employment Status is not Active. Only active staff are included. Set them active, then reset and re-process the run.

Where do paid salaries appear in the accounts?

On the payslips, using the payment date and mode chosen when marking the run paid. Cash payments show in the Cash Book; bank transfers and cheques show in the Bank Book.

Can I skip an advance recovery this month?

Yes. Leave Adv. Deduct blank or 0 and the full balance carries forward to next month.
